

George S. Patton said, *"Always do more than is required of you."*

Haweke is taking this journey with our new Light Truck Kit.

With the large number of light trucks on the road, tire stores across the country are demanding proper tooling for balancing these larger wheels. Haweka USA meets these demands with The Haweka Light Truck Kit. The cone and spacer in the Light Truck Kit are designed to fit all domestic $\frac{3}{4}$ ton pickups and medium duty fleet trucks.

Talk to your customers about expanding their customer base to fleets and larger passenger trucks. The Haweka Light Truck Kit is just one of many products we offer to improve the product range and balancer accuracy for tire shops of all sizes. Haweka offers accurate solutions to your most difficult balancing problems.

Kit includes centering cone and distance spacer disc.
Fits truck wheels with center bore diameter of 4 13/16" to 6 15/16" (122 - 174mm)
Works with Ford alignment pin.
